

HUMIDIFIER

TL3600

Description:

The Tairing humidifier is an agriculture mist fan based on the advance centrifugal atomization that turns water into micro droplets by centrifugal force with its rotating disk and droplet-spraying device.

Application:

The Tairing humidifier is best use while working under the scorching weather. The mist will help absorb the heat, which decreases temperature as well as increasing humidity all at the same time. The humidifier will also decrease bug dusts and purifies air. It is applicable in a vase range of places such as workshops, warehouses of the machinery industries: casting, forging, chemical industry, metallurgy, heat treatment, textile, glass products; as well agriculture industries, mushroom farming, animal farming, green house; amusement parks, supermarkets, hospitals, exhibition halls, outdoor bars, cafes, and so on.

Model	TL-3600 CENTRIFUGAL HUMIDIFIER
Water Storage(L)	4.5
Power Consumption(A)	0.6/hour
Weight(kg)	7.5
Height (CM)	40
Width (CM)	32
Water Consumption(L)	3.5-4.5/hour
